CENTRAL HEALTHY START is one of 32 Healthy Start Coalitions in the state. The Coalition serves four counties: Citrus, Hernando, Lake and Sumter, most of which are rural with low population density. Income levels within the Coalition are slightly lower than the state. Given its sheer size and demographics, access to prenatal care and health disparities among minorities remain the pressing challenges in this area. Central Healthy Start is dedicated to using its funding strategically to reach a large percentage of the communities we serve—and specifically, families with pregnant women, infants and children up to age three who are most at-risk for poor birth outcomes and need help with healthy child development.

SERVICES include the following:

Home Visiting: One-on-one support in the home or another convenient location; friendly advisors throughout pregnancy and after the baby is born; access to services that are designed to meet unique needs.

Prenatal Education & Support: Information on changes that happen to a woman's body and emotions during pregnancy; what to expect during labor and delivery; nutrition, medicine and exercise that can help or harm a pregnant woman or baby; warning signs of an early delivery.

Breastfeeding Education & Support: Techniques for successful and enjoyable breastfeeding; answers to any questions or concerns about breastfeeding; information on how breastfeeding benefits mom and baby.

Newborn Care: Tips on how to take care of a new baby, keeping baby safe according to the latest safety guidelines on sleep, car seats and more; infant nutrition; proper growth for baby.

Parenting Education & Support: Preparation for baby coming home; tracking and supporting baby's development; ways to play and connect with baby; how to become baby's first teacher.

Health & Well-Being: Help with planning for future pregnancies; making healthy lifestyle choices for the family; getting support for feeling anxious, stressed or having the "Baby Blues."
